BACK-ACTIVE SITTING: ENJOY THIS FREEDOM

Andreas Sperber
Physiotherapist and
Ergonomics consultant

“The new ergo balance technology: **For model R14, R12, XP and XT** a new mechanism with very special features has been developed by ROVO: This new trend-setting construction includes the combination of a synchro-mechanism with 3-D-technology. The innovative 3D-technology animates sitting in a healthy position with high flexibility. The body remains active.“

Special features: The optional version **ERGO BALANCE PLUS** is equipped with tension control to suit body weight and is lockable.
