GENERATES ENERGY

**ROVO FUN 2045 SR**  
 Swivel chair with high backrest.  
 SR-technique. Aluminium base silver.

**ROVO FUN 2075 SR**  
 Swivel chair with high backrest.  
 SR-technique. Armrests type 3.  
 Aluminium base polished.

**Balance technique**  
**Active seating with Balance Technique:**  
 With the SR backrest tilt mechanism, the user can exercise his muscles. The seat reacts to movement of the body, keeping it balanced. It moves independently from the backrest around the central axis of the seat and tilts right forward (up to -10°) so that the pelvis is automatically straightened ensuring that the spine adopts its natural double S-shape in the sitting position. Temporarily one can sit comfortably with the back away from the backrest. The seat can be locked in the basic position (i.e. not tilted forward).

**ROVO FUN 2075 SN3**  
 Swivel chair with high backrest.  
 Synchrone mechanism SN3 with seat depth adjustment. Five-star plastic base black.

**ROVO FUN 2075 SN**  
 Swivel chair with high backrest.  
 Synchrone mechanism SN with seat depth and seat angle adjustment. Armrests type 6. Aluminium base polished. AIR PLUS.

**Lumbar Support AIR PLUS:**  
 AIR PLUS is the orthopaedic air cushion lumbar support system that can be individually adjusted. The chair becomes like custom-made and supports a healthy sitting posture and prevents back problems.

**Hard-wearing fabrics, e.g. price group 2 microfiber**

Colour examples: Seat and back can be two-coloured.

ROVO FUN available in 4 different mechanisms: S, SR, SN, SN3
