GENERATES ENERGY

GENERAL CATALOG

ROVO COMPANY

INDEPENDENT AND INNOVATIVE – SINCE 1964

DYNAMIC SITTING AS
THE CORE COMPONENT
OF THE BRAND ROVO

ROVO is a rapidly expanding medium-sized family owned enterprise with international presence. The development and production of ergonomic office chairs is our corporate philosophy.

High quality standards, flexibility, decades of experience, state-of-the-art technology by highly automated manufacturing processes, profound production result into excellent products and satisfied customers.

With the help of motivated skilled employees and numerous product-, innovation- and design awards we rank among the most successful addresses in our industry.

The good market position is not only based on the high competence, the use of resources in respect to ecological care and awareness, but also on economic efficiency and good customer service in order to meet today's health requirements for excellent office chairs.

Product developments are devised in a team with professional health practitioners, physiotherapists and international designers to create seating concepts that offer natural freedom of movement in the office and new forms of sitting. The main aim is always to provoke often changes of posture and to increase well-being and good performance.

ROVO ENVIRONMENT MANAGEMENT

ECOLOGICALLY SUSTAINABLE AND CERTIFIED

The environmentally friendly production mode has always been part of ROVO's corporate philosophy. Minimizing energy consumption, waste volume and environmental impacts at all stages of the product development chain constitute an ongoing process in our company. The integrated environmental management system was established in 2007 and certified in accordance with ISO 14001 and audited annually by independent institutes. Environmental processes are an integral part of the corporate policy and are constantly evolving. This also applies to the requirements for our suppliers and the selection of them. Changes and innovative modifications in environmental legislation are quickly received and implemented.

ROVO products are designed in such a way that both production and disposal are optimized in an environmentally friendly way. For example, the ROVO R12 chair series consists of pollutant-free materials. About 70% of recycled material is used for the production. Pure material separation and dismantling without special tools is possible in a short period of time. Wearing parts are exchangeable, which prolongs the life cycle of the chair. Due to high-quality and durable long lasting components, we help to conserve resources and minimize energy usage. As an additional benefit this results into low spare parts consumption during the life time cycle.

Product packaging is 100% recyclable. In addition, no styrofoam, aluminum and composites are used in the product packaging. We pay attention to the smallest possible dimension in order to reduce volume for transportation.

At ROVO more than 80% of production waste is recyclable – at a very high manufacturing level. All polyurethane components are foamed CFC-free. In the production process itself, savings are made with respect to resources. For example, the water for production is completely recycled and the CO2 emissions constantly reduced by energy-saving technology. An ongoing improvement of the machinery and a consistent conversion to energy saving manufacturing equipment contribute to environmental protection. In 2012, for example, all hydraulic bending machines were exchanged to electrical machines.

The internal transport system was optimized by an intelligent control in such a way that energy consumption has fallen by more than 50%. In addition, we store all of parts centralized at site, fully automated and efficient. This reduces energy demand and increases availability of individual items.

A factory bus service gets staff comfortable from their home to work and back, reducing CO2 and traffic.

Since we understand the environmentally friendly production as a dynamic process, we will continue to invest in this respect in know-how and technology in the future. The current development can be seen on our website.

ROVO CERTIFICATES

Many ROVO models have got the label "Ergonomics Approved" as well as the label "GS Safety Approved".

The quality system of ROVO was certified first time in 1994. The environmental certification according to ISO 14001 followed in 2007.

The ERGO BALANCE Technology is recommended by IGR, Institute of Health and Ergonomics.

2009 ROVO received by the Professional Association certification under the Occupational Safety OSH 2001.

Product label in accordance with high standards and quality criteria for office work, certified by the Quality Forum for Office Furniture.

Test results by the business magazine FACTS for different ROVO products.

We do more: That is why we grant 5 years warranty (according to ROVO's conditions of warranty).

The models ROVO R12, ROVO R16 and ROVO SOLO were awarded the German Design Award.

reddot design award winner 2018

The design of the models ROVO R12 and ROVO SOLO was honored with the Red Dot Design Award.

ROVO SOLO and ROVO TWIST were awarded the GOOD DESIGN AWARD of the Chicago Athenaeum Museum of Architecture and Design.

ROVO R12

THE PURE FORM OF DYNAMICS

SLIM, LIGHT
AND ACTIVE

Leather finish
with upholstered
back, mechanism
ERGO BALANCE NEXT.

6070 EB NEXT

3450 A

The R12 sets standards in ergonomics, design and technology – with a large product line. Characteristic is the emphatically slim silhouette with the innovative FLEX-RELAX lamellar system in the backrest. This concept stands for high flexibility and first-class back support. The air permeability of lamellar and fabric ensures a pleasant seating climate. The ROVO comfort synchro-mechanism shows a harmonious movement with a wide opening angle for both relaxed and dynamic sitting.

ROVO R12

**DISTINCTIVE
DESIGNED LINES**
CONTRIBUTIONS
TO OFFICE CULTURE

Picture on the right side: Typical
for ROVO R12 is the adjustable
lumbar support (Option). Version
with upholstery in Bicolor.
Back connector and base are
powder coated in silver.

6060 S6

6060 EB NEXT

6060 EB

The slim line is characteristic for this chair design. Executed with mesh fabric, the lamellas are permeable to light. Even in the version with upholstery, this structure is emphasised by the welded fabric. If seat and back cushions will be realized in Bicolor, interesting colour accents can be set. Equipped with ERGO BALANCE technique, ROVO R12 is the activating office chair for all requirements concerning movement.

The ERGO BALANCE Technology is recommended by IGR, Institute of Health and Ergonomics.

THE INNOVATIVE 3D SEATING TECHNOLOGY

BACK ACTIVE SITTING –
HEALTHY AND FIT IN THE OFFICE

Exercise is healthy and is important to prevent diseases of muscles and of the skeleton. But especially in the office back problems are the most common causes of missing days. To counteract to this and also to create possibilities to be actively in motion at the desk, new solutions for sitting in movement were created by ROVO. Incidentally ERGO BALANCE activates and encourages spontaneous posture changes. This patented technology is unique and has proven itself thousands of times since its launch in 2010. Enjoy freedom of movement with ERGO BALANCE in the series R12, R16, XP, ECO and SOLO.

ERGO BALANCE TECHNOLOGY

ERGO BALANCE NEXT ONE SYSTEM – TWO OPTIONS

ERGO BALANCE NEXT, the motion mechanism of the new generation, is the solution for individual wishes. With a quarter of a turn of the adjustment ring, it can be switched on or off, making it possible to quickly switch between pure synchronous technology and additional ERGO BALANCE technique with back-active sitting. This option creates a useful solution for office facilities.

We learn from the evolutionary history of man, that the human body was evolved for movement and endurance. Static sitting at the desk is not what the human being was provided for. Varied muscle movements are essential to ensure physical and mental performance. They stimulate blood circulation and provide the entire body with additional oxygen. The pressure change of the intervertebral discs due to movement of the spine is a necessary requirement for the metabolism. Not only the back takes benefits, movement also helps against possible strain and supports the whole organism.

Exercise stimulates the circulation and the metabolism. The oxygen supply ensures that we are focused and powerful and that our brain can work at full capacity. So what could be better than transferring this important effect of activation into the office life of the sitting person in order to increase physical and mental fitness?

ACTIVATES BODY AND MIND THE EFFECTIVE TECHNOLOGY AGAINST MUSCLE AND SKELETAL ILLNESSES

- Activates the back muscles
- Increases blood circulation and stimulates metabolism
- Relieves the spine and keeps the intervertebral discs elastic
- Animates to move and to change seating position
- Safe, balanced sitting comfort
- = Effective prevention of musculoskeletal disorder

ERGO BALANCE brings three-dimensional freedom of movement into sitting. The technical basis of every ERGO BALANCE chair is the ERGO BALANCE system with an integrated synchro-mechanism. A movement element with two different elastomers makes seat and back of the office chair movable by 360°. As on the gymnastics ball, free rotary movements are possible – but guided, dosed and safe. This is due to the dynamic counter-pressure of the elastomers, which keep the body's center of gravity in balance in each seating position.

Small pelvic movements and micro-movements of the muscles are provoked and lead to activation of the back muscles. The blood circulation and oxygen supply get increased and the moisturization of the intervertebral discs is stimulated. Quite automatically, ERGO BALANCE encourages to actively move and to a natural, healthier posture.

ROVO R16

3030 S6

3450 A

SLIM LOOKING SILHOUETTE FILIGREE APPEARANCE

The characteristic feature of the ROVO R16 is the slim back profile: Light, ergonomic and distinctive. The back design was inspired by the shape and static of a bridge pillar. The silhouette features two high-curved arms holding the back frame in a Y-shape. The mesh covering offers interesting perspectives on the design. The typical designer base is available in black plastic for the first time – with excellent stress properties. The form and function was rewarded with the German Design Award Winner 2019.

ROVO R16

**LIGHT, HANDY,

3030 EB

3040 EB NEXT

3150 A

The lumbar support (optional)
can be moved to the desired height
and can be adjusted in depth.

Various equipment features, technical variants and ingenious details make ROVO R16 a universal furnishing solution in the office. Already in the standard version, the chair offers a comfort synchro-mechanism with the option of an additional seat tilt adjustment. An adjustable lumbar support can be integrated into the height adjustable back support. Design variants are mesh covered or upholstered backrest. The 3D technology ERGO BALANCE (option) offers more natural freedom of movement and keeps the body active even while sitting. This technology, for the very first time, was installed in a conference chair for an activating effect in meetings.

ROVO XP

**THE ART OF
RELAXATION**
COMPETENCE IN
SITTING COMFORT

4410 A

4020 EB

The large ROVO XP product family offers attractive solutions for all working areas in the office. The contour of the backrest with perfect support function has a very positive impact on the relaxation. Particularly remarkable are the cushions of the seat and the back, offering optimum convenience. The ergonomically shaped seat encourages blood flow to the legs.

Different comfort mechanisms, height-adjustable backrest, the lumbar support AIR PLUS – ROVO XP is completely designed for individual adjustment requirements. The version with the ERGO BALANCE technique offers in addition three-dimensional freedom of movement and activates the change of posture. You have the choice.

ROVO XP

FACILITY FURNISHING
ALL IN ONE
INDIVIDUAL IN CONCEPTION

4010 S1

4015 S4

4045 S4 with plastic back shell

If large properties are to be outfitted, than individual comfort levels have to be taken into account. ROVO XP offers user-oriented equipment options in a strict design line. The spectrum ranges from simple office chairs up to the program for the boardroom. Rooms can be designed according to corporate design specifications via colour accents of the upholstery. With the option to integrate the 3D technology ERGO BALANCE, occupational health requirements are met.

4030 EB NEXT

4415 A

4405 A

**ADJUSTED TO TOP
PERFORMANCE**
DISTINCTIVE SHAPE

If workplaces are used by several employees or in shiftwork, ROVO XP offers interesting options. Equipped with the automatic function, this chair adapts spontaneously to the weight of the user and automatically ensures ergonomically optimized sitting. The ROVO XP with S24 mechanism is designed to be particularly robust in terms of technology and upholstery fabric – especially for the 24-hour usage or for well proportioned people. With the wide selection of matching visitor chairs, ROVO XP is the ideal program for ambitious facility requirements. The extensive range of fabrics and leathers enables sophisticated interior concepts to be realized.

ROVO SOLO

BALANCING ACT

SIT. STAND.
MOVE.

3810 with monopad

3810 with ring

3850 artificial leather carbon optics

To quickly take a seat or to stand together for a short time. The sitstand ROVO SOLO really brings new life into the workplace – at small meetings, creative team meetings, during a quick exchange of ideas with colleagues. The core of this health-promoting seating concept is the ERGO BALANCE technology, which is integrated both in the base and under the seat. ROVO SOLO compresses smoothly and encourages to a variety of movements. It provides a secure hold and a good sitting feeling in every position, because the further you move to the side, the stronger will be the counter-pressure of the ERGO BALANCE technique. Equipped with the continuous gas spring height adjustment, ROVO SOLO can be perfectly adjusted to almost all body sizes. ROVO SOLO has been honored with the GOOD DESIGN AWARD by the Chicago Athenaeum Museum of Architecture and Design.

ROVO TWIST

FOR OPEN COMMUNICATION
CHAIR, TABLE AND SITSTAND

Awarded with the Good
Design Award, Chicago
Athenaeum Museum of
Architecture and Design

9800

ROVO TWIST invites to a meeting, shortens the waiting time and has a stimulating effect on how to communicate. Forget tables. Hierarchy was yesterday. ROVO TWIST represents the working world of the new generation. You need a sitstand? A short exchange of ideas? ROVO TWIST puts teams together. And makes communication a creative event. The seat can be rotated. The backrest is designed as a tabletop, with 100 kg loading capacity and can also be used as an armrest, as a back support or as a standing assistance. Because the next sitting position is always the best.

ROVO LOUNGE

COMFORT ZONE

SENSE OF WELL-BEING.
REPRESENTATION.
MEETING PLACE.

9200

9100

Where people meet, communicate or just relax, there is demand for ROVO LOUNGE. With comfortable armchairs that invite you to linger and that enhances each room. The elegant shapes and high-quality wool fabrics invite to try out and to experience. With ROVO LOUNGE, the world of working becomes more comfortable and the time off in between is a given.

ROVO **ECO**

Model ROVO ECO S6
with integrated lumbar
support AIR PLUS.

1050 S5

1060 S6

DARE COLOUR – SET ACCENTS THE MULTIFUNCTIONAL SOLUTION FOR MODERN OFFICE WORLDS

Are you looking for proven, robust companions for your day-to-day work? Office and visitor chairs that work in universal areas of application and which can even implement individual colour concepts? You've come to the right place.

ROVO ECO

The colour range for ROVO ECO offers plenty of possibilities either to pick up company colours or to choose contrasting colours for seat and back.

THE OFFICE CHAIR

TIMELESS, CLEAR AND FUNCTIONAL

Wide cushions, synchro-mechanism, individual adjustments. The robust ROVO ECO chair series with plastic back shell offers a lot. It suits for low budgets and the various versions with multiple heights of backrests, seat sizes and adjustment areas make it possible to adapt these chairs equally to large and to small people. In addition, equipped with ERGO BALANCE technique, ROVO ECO also encourages moving when sitting. This is really fun and keeps awake both body and mind.

THE ALL-ROUNDERS

STACK, COMBINE AND LINK

These handy stackable chairs look inviting at events, at meetings or in waiting areas. They can be equipped with row connectors. Variants in frame and upholstery colours bring freshness to the interior design. Please take a seat.

ROVO XZ

A STATEMENT
THE ELEGANCE
OF QUALITY

7020 A

7030 A

7210 A

Straight, distinctive design and first-class seating comfort are the characteristics of this executive armchair program. That's why ROVO XZ offers the best of everything. The equipment is optimized point by point for ergonomic working. The comfort synchro-mechanism offers a relaxed working position, which is even intensified by seat tilt adjustment, variable front edge and seat depth adjustment. In the lumbar area the back is supported by AIR PLUS. The upholstery structure in the seat is made of mini-spring boxes and viscoelastic ROVO PUR foam which has a pressure relieving effect and adapts to the body shape by weight and temperature. Natural, finest tanned nappa leathers are noble and guarantee a really soft touch. They can be equipped with interesting coloured double seams.

ROVO XL

FEEL STYLISH

FOR AESTHETIC
DEMANDS AND
COMFORT

5910 A

5410 A

An executive chair like it should be: Classic lines and smooth leather in highest quality finishing. Integrated as standard is the smooth synchro-mechanism S4 with all comfort functions and multifunctional armrests as an option. Great to look at and even better to enjoy. Ideally on a daily basis.

ROVO XN

ELEGANCE THAT STIMULATES DESIGNED FOR PURISTS

2425 AS

This fully upholstered design fits just as good in the workplace as in the home office. The height adjustable backrest invites to colour accents. Upholstery fabrics in strong tones allow a selection according to company colour or furnishings. Concerning the seating comfort there is nothing to miss. Enjoy the dynamic synchro-mechanism and many comfortable possibilities of individual adjustments.

ROVO BUGGY

CHILDREN GROW

THIS CHILDREN'S
CHAIR GROWS, TOO

Adjustment of seat depth and seat height to the growth of the child: With adjustment to body size and with seat suspension adjustment to body weight.

3907

3907

3907

Patented technology since 1985, ergonomics suitable for children, developed with help of Prof. Dr. Dr. Karlheinz Nier

The first of its kind and still unique: BUGGY is the growing desk chair for children and young people, encouraging from the beginning to an ergonomically correct sitting posture. This is more important nowadays, as children and young people spend considerable more time at their desks. The adjustable seat suspension invites to rock and bounce, instead of sitting fixed like before. The secret why BUGGY is growing and why it is suited for children and young people from small to large equally, is the patented form of the frame.

MECHANISMS

FUNCTIONS IN THE OVERVIEW

SELECT YOUR COMFORT

AIR PLUS System
AIR PLUS was developed by ROVO. This orthopedic air cushion lumbar support system can be individually adjusted by the use of a hand pump. AIR PLUS is available for most models as an option. The chair supports a healthy sitting posture and prevents back problems.

The range of Mechanisms

All ROVO swivel chairs offer dynamic sitting with synchronized technology. Different adjustments are available for individual seating comfort and depending on the swivel chair series. The S24 mechanism is intended for the 24 hours chairs of the ROVO XP series. ERGO BALANCE technology is available for the R12, R16, XP, ECO and SOLO.
